

JEEVAN

MERN Stack Developer | Web3 Developer

Gurgaon, Haryana | jeevanyadav9898@gmail.com | +91 9560884180

[LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Full-Stack Development, Blockchain, and Machine Learning with experience building MERN applications, smart contracts, decentralized applications, and AI-powered software solutions.

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, C, Solidity

Frontend: React.js, HTML5, CSS3, Bootstrap, Vite

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Multer, Cloudinary

Database: MongoDB, Mongoose, MySQL, SQL

Blockchain / Web3: Ethereum, Solidity, Hardhat, Ethers.js, OpenZeppelin, MetaMask, ERC-20, IPFS, Chainlink (Basics)

Machine Learning: NumPy, Pandas, Matplotlib, Scikit-learn

Tools & Platforms: Git, GitHub, Postman, VS Code, Remix IDE, MongoDB Compass, npm, Render, Vercel

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

EXPERIENCE

Front End Web Developer Intern

The Coding Arena

- Developed responsive and user-friendly web interfaces using React.js, HTML, CSS, and JavaScript.
- Worked with component-based architecture and state management for scalable frontend development.
- Collaborated in a team environment using Git and followed agile development practices.

Open Source Contributor

GirlScript Summer of Code (GSSoC) 2025

- Contributed to real-world projects by fixing UI/UX issues and adding new features.
- Collaborated with maintainers and followed Git-based contribution workflows.

PROJECTS

DeFi Lending & Borrowing Protocol | Solidity, Hardhat, React

https://github.com/ChainForgeX/Lending_Borrowing_Protocol_DeFi

- Built a decentralized lending platform with collateral-based borrowing.
- Implemented smart contracts for deposits, borrowing, repayments, and withdrawals.
- Integrated Chainlink price oracles and ERC-20 token interactions.
- Developed a React frontend for wallet connectivity and protocol interaction.

Yield Farming Platform | Solidity, React, Ethereum

https://github.com/ChainForgeX/Yield_Farming_Protocol

- Developed a decentralized yield farming application allowing users to stake assets and earn rewards.
- Implemented staking, reward calculation, reward claiming, and withdrawal mechanisms.
- Integrated wallet connectivity and real-time reward tracking.

Customer Segmentation | Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter

https://github.com/ChainForgeX/Customer_Segmentation

- Unsupervised machine learning model for customer behavior analysis.

- Developed an end-to-end clustering pipeline using the Mall Customers dataset, implementing exploratory data analysis, feature scaling, K-Means clustering, the Elbow Method, centroid analysis, and silhouette evaluation to identify meaningful customer segments for targeted marketing and business insights.

Heart Disease Prediction | Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter

https://github.com/ChainForgeX/Heart_Disease_Prediction

- Machine learning classification system for early heart disease prediction.
- Developed an end-to-end classification pipeline using a real-world medical dataset, implementing exploratory data analysis, feature encoding, preprocessing, model comparison, cross-validation, and hyperparameter tuning. Evaluated multiple classifiers using Accuracy, Precision, Recall, F1-Score, Confusion Matrix, and ROC-AUC to identify the best-performing model.

AI Resume Analyzer | React, Node.js, Express.js, MongoDB, AI API, Multer, Cloudinary

https://github.com/ChainForgeX/AI_Resume_Analyzer

- Developed an AI-powered resume analysis platform that evaluates resumes and provides personalized improvement suggestions.
- Implemented secure file upload, resume parsing, and backend APIs for processing and analysis.
- Built an interactive dashboard to display resume scores, strengths, weaknesses, and actionable recommendations.
- Designed a responsive user interface with seamless frontend-backend integration for an enhanced user experience.

EDUCATION

B.Tech in Computer Science & Engineering — 2024 – 2028

Dronacharya College of Engineering

CGPA: 8.3

Senior Secondary (PCM) — 2024

Heera Public School, CBSE

Percentage: 75%

Secondary (10th) — 2022

Heera Public School, CBSE

Percentage: 86%

CERTIFICATIONS

- The Complete Full-Stack Web Development Bootcamp – Udemy (Dr. Angela Yu)
- C for Everyone: Structured Programming (With Honors) – Coursera / UC Santa Cruz
- Ethereum & Solidity – Udemy
- Crash Course on Python – Coursera (Google)

ACHIEVEMENTS

- Participant – Adobe India Hackathon 2025
- Active open-source contributor – GSSoC 2025

LANGUAGES

English (Professional) | Hindi (Native)
